Synopsis

Project Title: -   Online-Pizza-Ordering Portal

Introduction:-

Online pizza ordering portal is web application which is used to order the pizza. There are many sites like Dominos, Pizza-Hut and so on. But this web application is useful because it is a customize application i.e. if you want to add new feature to it then you can add, but other's software's we cannot able to change.

This project is strong enough for payment gate-way, ordering pizza and we will also allow add to cart option in this. As we are creating a project for academic level it cannot run real time.

Technology and Tools/Software's :-

- Java (JSP - Servlet)
- Xampp Server
- HTML-5 & CSS-3
- Bootstrap

Teams :-

-
-

Features :-

- Pizza List
- Order Now
- Add To Cart
